01/05/2010

Dear Sir / Madam

As of June 2007, the European Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) entered into force.

As a downstream user of chemical substances and importer and distributor of articles, Winslow Adaptics is fully aware of the requirements of REACH. We are working with our suppliers to confirm their intent to register pertinent substances used in Winslow Adaptics various product lines. It is our objective to fully comply with REACH securing the dependable supply of our products to our customers.

The Candidate List of Substances of Very High Concern (SVHC) was first published on the website of the European Chemicals Agency (ECHA) in October 2008 and has been followed by a number of revisions.

Winslow Adaptics operate a process with our suppliers to establish the current status, with respect to SVHCs, in the materials we use to manufacture our products (articles). This is an ongoing process as new materials and models are frequently being introduced into Winslow Adaptics many product lines and as the European Chemicals Agency (ECHA) continue to revise their candidate list. Based on our knowledge of the materials we use and the information from our suppliers to date, we do not anticipate the presence of any of the currently listed SVHCs in our products or in quantities greater than the threshold of 0.1% (w/w). If it is determined that any of our products contain SVHC, notification procedures per REACH requirements will be followed.

Alan Baker
